

Carbon Neutral by 2020

How New Zealanders can tackle climate change

EDITED BY NIKI HARRÉ & QUENTIN D. ATKINSON

Climate change has become one of the central issues of our time, yet it is an issue weighed down by messages of doom and gloom and a pervasive sense of helplessness about how we should effectively respond.

This book offers a positive response by presenting solutions from a range of New Zealand experts, all of whom show how we can rethink our current practices, mobilise people and put in place new ways of doing things that will help create a carbon neutral society here in the South Pacific.

The editors, Niki Harré and Quentin D. Atkinson, are both psychologists associated with the University of Auckland, whose interests in the area of psychological wellbeing have led them to tackle this issue. In *Carbon Neutral by 2020* they begin with an introduction that looks at how a positive response to climate change can actually contribute to a fulfilling, meaningful life. They then present a wide range of chapters from many different specialists and academics who cover such areas as the role of education; sustainable business practice; using computers to manage carbon emissions; travel and transport; green architecture and sustainable renovation; and responsible investment, as well as many more subjects. Each chapter presents a vision for a carbon neutral New Zealand. The editors conclude the book with actions individuals and organisations can take to be part of the solution.

The book is aimed at a general readership, both individuals and organisations, and it is hoped that it will be read by managers and employees in small and large businesses, people working in local government, community organisations, schools and tertiary institutions, as well as any citizen who is concerned and wants to do something positive. This is a timely, important book and a positive response to an absolutely critical issue from many of the best-informed people in New Zealand.

CONTRIBUTORS include:

- Dr Alexei Drummond and associates from the Computer Science Department at the University of Auckland
- Dr Prue Taylor from the School of Architecture and Planning at the University of Auckland
- Rachel Brown, CEO of the Sustainable Business Network
- Heidi Mardon, National Director of EnviroSchools
