

# Sustainable Procurement Activator Course 2022

SUSTAINABLE BUSINESS NETWORK

**Do you want to clean up your supply chain and  
use your purchasing power for good?**

Join our Activator Course and learn how sustainable procurement practices can make a positive impact on your business and supply chain.

Businesses like yours can have a huge influence. You can set high standards for things like climate, waste and nature in your procurement policies. But it can be tough finding the right suppliers and knowing what to ask them. It's also challenging to know how to monitor changes, measure success and get leadership buy-in. Making this the norm means changing the system for everybody.

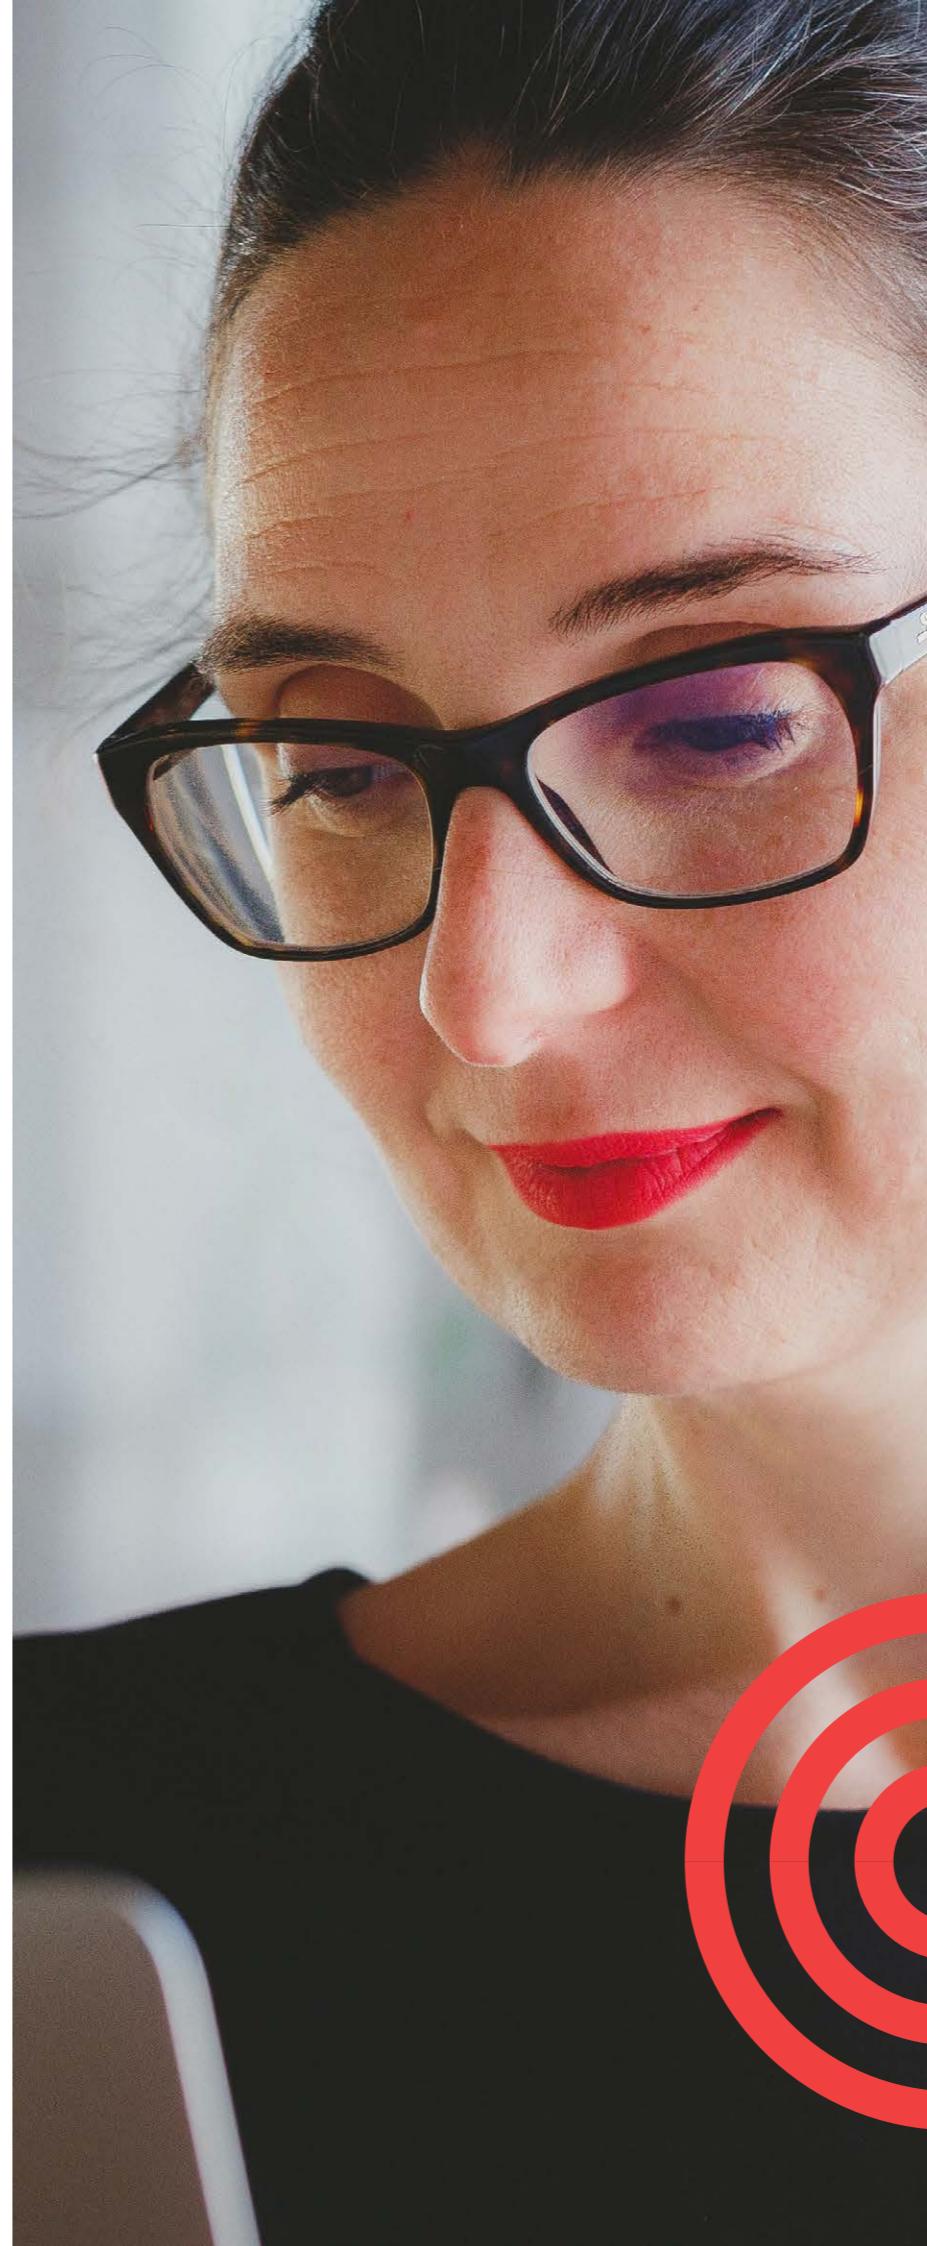

Our Activator Course is a great place to start. It's designed for bigger businesses with long supply chains. We've worked with 37 of this country's largest procurers to create the content. Together we've defined best practice for sustainable procurement and its implementation in Aotearoa New Zealand.

## OUTLINE

The course includes five interactive online workshops which will help you to:

- understand what best practice looks like for your business
- identify the tools, resources, and solutions required to transition to best practice
- achieve leadership buy-in and lead effective change with case studies, expert advice, and knowledge-sharing
- gain a network of peers and learn from their experiences
- develop an action plan for implementing sustainable procurement in your business

Upon completion of the Activator Course, businesses showing evidence of leading change will be invited to join the Sustainable Procurement Leaders Group.

COURSE 2022
